

Blingster Battle (English)

How To Play

To beat each level, drop gems and blocks on the stack. Clear chains of blocks from the stack by dropping a same-colored gem on the blocks.

Controls

Press DOWN to drop the blocks or gems under the cursor. Press LEFT and RIGHT to move the cursor. Press OK to swap the blocks or gems under the cursor.

Solo Player

- **Classic:** Beat each level by clearing all the blocks.
- **Puzzle:** Using a minimum number of drops, clear all the colored blocks.
- **Action:** Clear blocks as fast as you can. After a few seconds, the stack will shake. Once you make a drop, a new line of blocks will be added to the bottom.

If you exit the game, your progress will be saved and you can Continue the next time you play.

Multiplayer

Play live against other players over the network in multiplayer mode. When you clear blocks and gems from your stack, blocks are dropped on the other player's stack. A window in the bottom right shows you the other player's stack.

Register or login with a unique username and password to keep track of your online score. A Guest Login allows you to play online without registering.

To quickly play against any other player, use "Auto-Match". To play against a specific person, select "Challenge" then "By Username". You can also play against someone of a specific skill level by selecting "Challenge" and then selecting a skill level.
