

Princess Kate has been kidnapped by the evil Orc King! Rescue her by shooting your way through the king's army of deadly monsters using the arrow buttons or number pad. Each monster you shoot adds to your blue monster bar, and when it's completely full you'll beat the level. Your green health bar will decrease over time...don't let it get to empty or you'll lose the game. Shoot power-ups to get bonus points, a health boost, and special powers, but make sure you don't hit poison or the princess!

Play any one of four difficulty modes:

Easy (3 button mode): The LEFT key fires at the left side of the screen, the UP key fires at the center, and the RIGHT key fires at the right side of the screen.

Medium (5 button mode): Use the LEFT, UP, RIGHT, OK, and DOWN keys to fire at the areas circled in white. Each circled area has a label telling you which button to press.

Hard (6 button mode): Use the 4, 5, 6, 7, 8, and 9 keys to fire at the areas circled in white. Each circled area has a label telling you which button to press.

Expert (12 button mode): Every number key plus # and * maps to a single hole or archway. Each hole or archway has a label telling you which button to press.

In all modes, press the CLR key to pause the game. Your game will be saved whenever you exit the game. If there is a saved game, you'll be able to select Continue from the main menu.

Power-ups will occasionally be revealed to assist you on your quest. Look for fruit to boost your health, a shield to temporarily protect you from bombs, a TNT barrel to blast all monsters off the screen, an hourglass to slow down time, and gold to increase your score. But watch out for green poison! Quickly search for the blue antidote if you get poisoned.

Now go save the princess!
